Cileungsi, Kab.Bogor , Jawa Barat

Motivated Software Engineering student specializing in web development and technology education. Consistently identify and resolve complex issues efficiently, rapidly master new technologies, and excel both independently and as a collaborative team member. Consistently deliver clean, efficient, and user-centric digital solutions by collaborating effectively within team environments

Work & Project Experiences

PT Mahardika Caraka Indonesia - Kota Bogor <i>Programmer Internship</i>	Jan 2024 - Apr 2024
- Collaborated with a team of 3+ developers to maintain and successfully implement 4+ new core features on the company's webbased applications. - Conducted debugging and code optimization using PHP, resolving 15+ technical bugs to improve web application performance and stability. - Utilized Git/GitHub for version control, streamlining code management and enhancing team collaboration among 3+ developers, resulting in 25% reduction in integration errors or 3 hours saved per project.	
Linguago App Project - Bogor <i>Backend Developer</i>	May 2026 - Jul 2026
- Engineered backend architecture, relational databases, and RESTful APIs, while managing end-to-end server hosting to support core mobile app functionality. - Implemented Flutter BLoC for state management across team modules, separating business logic from UI to improve app scalability and maintainability. - Identified and resolved 3+ critical bugs and performance bottlenecks during integration, improving overall system stability and data flow. - Utilized AI-assisted development tools (e.g., GitHub Copilot / ChatGPT) to accelerate code writing, debug issues, and streamline backend development efficiency by 80%.	
OfficeLink Web Project - Bogor <i>Web Developer</i>	Oct 2025 - Dec 2025
- Developed a full-stack employee attendance application using Laravel, Livewire, and MySQL, serving 2 distinct user roles (Admin and Employee) for structured access control. - Integrated HTML5 Geolocation API / Geofencing validation to restricting clock-ins within a 50-meter radius of designated office coordinates. - Designed reactive UI components and optimized database schemas, handling 5+ core operational features including user authentication, real-time presence logging, and automated attendance reports.	

Education Level

Politeknik IDN Bogor - Bogor <i>Diploma in Software Engineer</i>	Jul 2025 - May 2029 (Expected)
- Develop and implement end-of-semester projects as a form of learning evaluation at the end of each semester. - Experience using Git/GitHub for team collaboration and project documentation management. - Play a significant role in each project, utilizing frameworks such as Laravel, Flutter, and Bootstrap as needed.	
SMK Fatahillah Cileungsi - Cileungsi <i>Senior High School, Software Engineer</i>	Jul 2022 - May 2025
- Developed website and mobile application projects - Used to use Git/GitHub for project documentation - Appointed by the Head of the Software Engineering Study Program for a problem-solving initiative, positively impacting more than 3 students.	

Skills

- Programming Language:** PHP, Dart, HTML/CSS
- Frameworks & Libraries:** Laravel, Laravel Livewire, Flutter, Flutter BLoC, Bootstrap, Tailwind CSS
- Database & Tools:** MySQL, RESTful APIs, Git/GitHub, Postman, Cloud Server Hosting, VS Code, Android Studio
- Soft Skills:** Problem Solving, Debugging, Team Collaboration, Adaptability, AI-Assisted Workflow/Prompting, Communication, Critical Thinking.
